Fanzine Dark Souls

the first of the dead
gravelord nito

Nito, the first of the dead, is one of the original Lords who found a Lord Soul at the dawn of the Age of Fire. His soul turned him into a living manifestation of illness and death, a mass of skeletons held together. He, along with the other Lords, waged war against the Dragons, and helped issue the killing blow by unleashing a miasma of death and disease upon them.

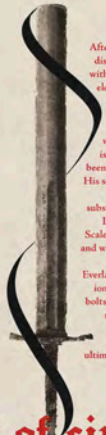
After the war with the dragons, Nito descended into the Catacombs, and slumbered within the Tomb of the Giants. Even in that state, he could administer the death of all life and offered much of the energy of his own soul to death itself. Travelers brave enough to find their way into his tomb would pay their respects and become a Gravelord Servant. They would use the Eyes of Death to cause hostile spirits to invade other worlds, spreading death throughout them, which allowed the multiplication of the Eyes of Death, which in turn allows death to increase exponentially. While Nito sees all death, and induces all death, his servants return with Eyes of Death to prove that they have done their tasks. In return for their service to him, Nito accepts these offerings, and presents his servants with more power.

nameless king

The Nameless King was a dragon-slaying god of war in the Age of the Gods and heir to lightning, until he sacrificed everything to ally with the ancient dragons. He tamed a Stormdrake and formed a close bond with it, leading it to countless battles. He is a former king. However, it is not known which kingdom he was the king of.

Dragonslayer Ornstein, another relic of the Age of Gods, left the ruined cathedral Anor Londo he once guarded in search of the Nameless King.

It is heavily implied that the Nameless King is the long-speculated firstborn child of Gwyn, Lord of Sunlight.



After the advent of fire, Gwyn discovered a Lord Soul along with the Furtive Pygmy, Gravelord Nito, and the Witch of Izalith; he was surrounded by knights when he found the Lord Soul and was dressed in regalia, so it is possible that he may have been a king before obtaining it. His soul allowed him to manipulate light, and generate a substance called lightning. The Lords allied with Seath the Scaleless and amassed an army, and with their power granted by their souls, challenged the Everlasting Dragons for dominion of the World. His mighty bolts peeled apart their ancient scales, allowing them to be killed by other means of attack, and they were ultimately defeated, but importantly not eliminated.

high lord wolnir

Once upon a time, each of the rightful lords of Carthus were bestowed crowns judiciously, until Wolnir brought them all to their knees, and conquered most kingdoms known to their people. Thus, the crowns of Carthus became one, and Wolnir the one High Lord

Wolnir eventually succumbed to the Abyss, and in falling, was gripped by a fear of true darkness; so he pleaded to the gods for the first time. He found some semblance of comfort from a holy sword and three trinkets stripped from the corpses of clerics. Wolnir sentenced countless souls to gruesome deaths, keen to outlive them all.

After Wolnir's fall to the Abyss, Grave Warden pyromancers discovered the Abyss' black flame and pioneered new pyromancies.
